

Investment, International Investment Agreements and Public Private Partnerships

Oshani Perera

Director of the Public Procurement and Infrastructure Finance Programme

International Institute for Sustainable Development

THE GLOBAL GOALS

For Sustainable Development

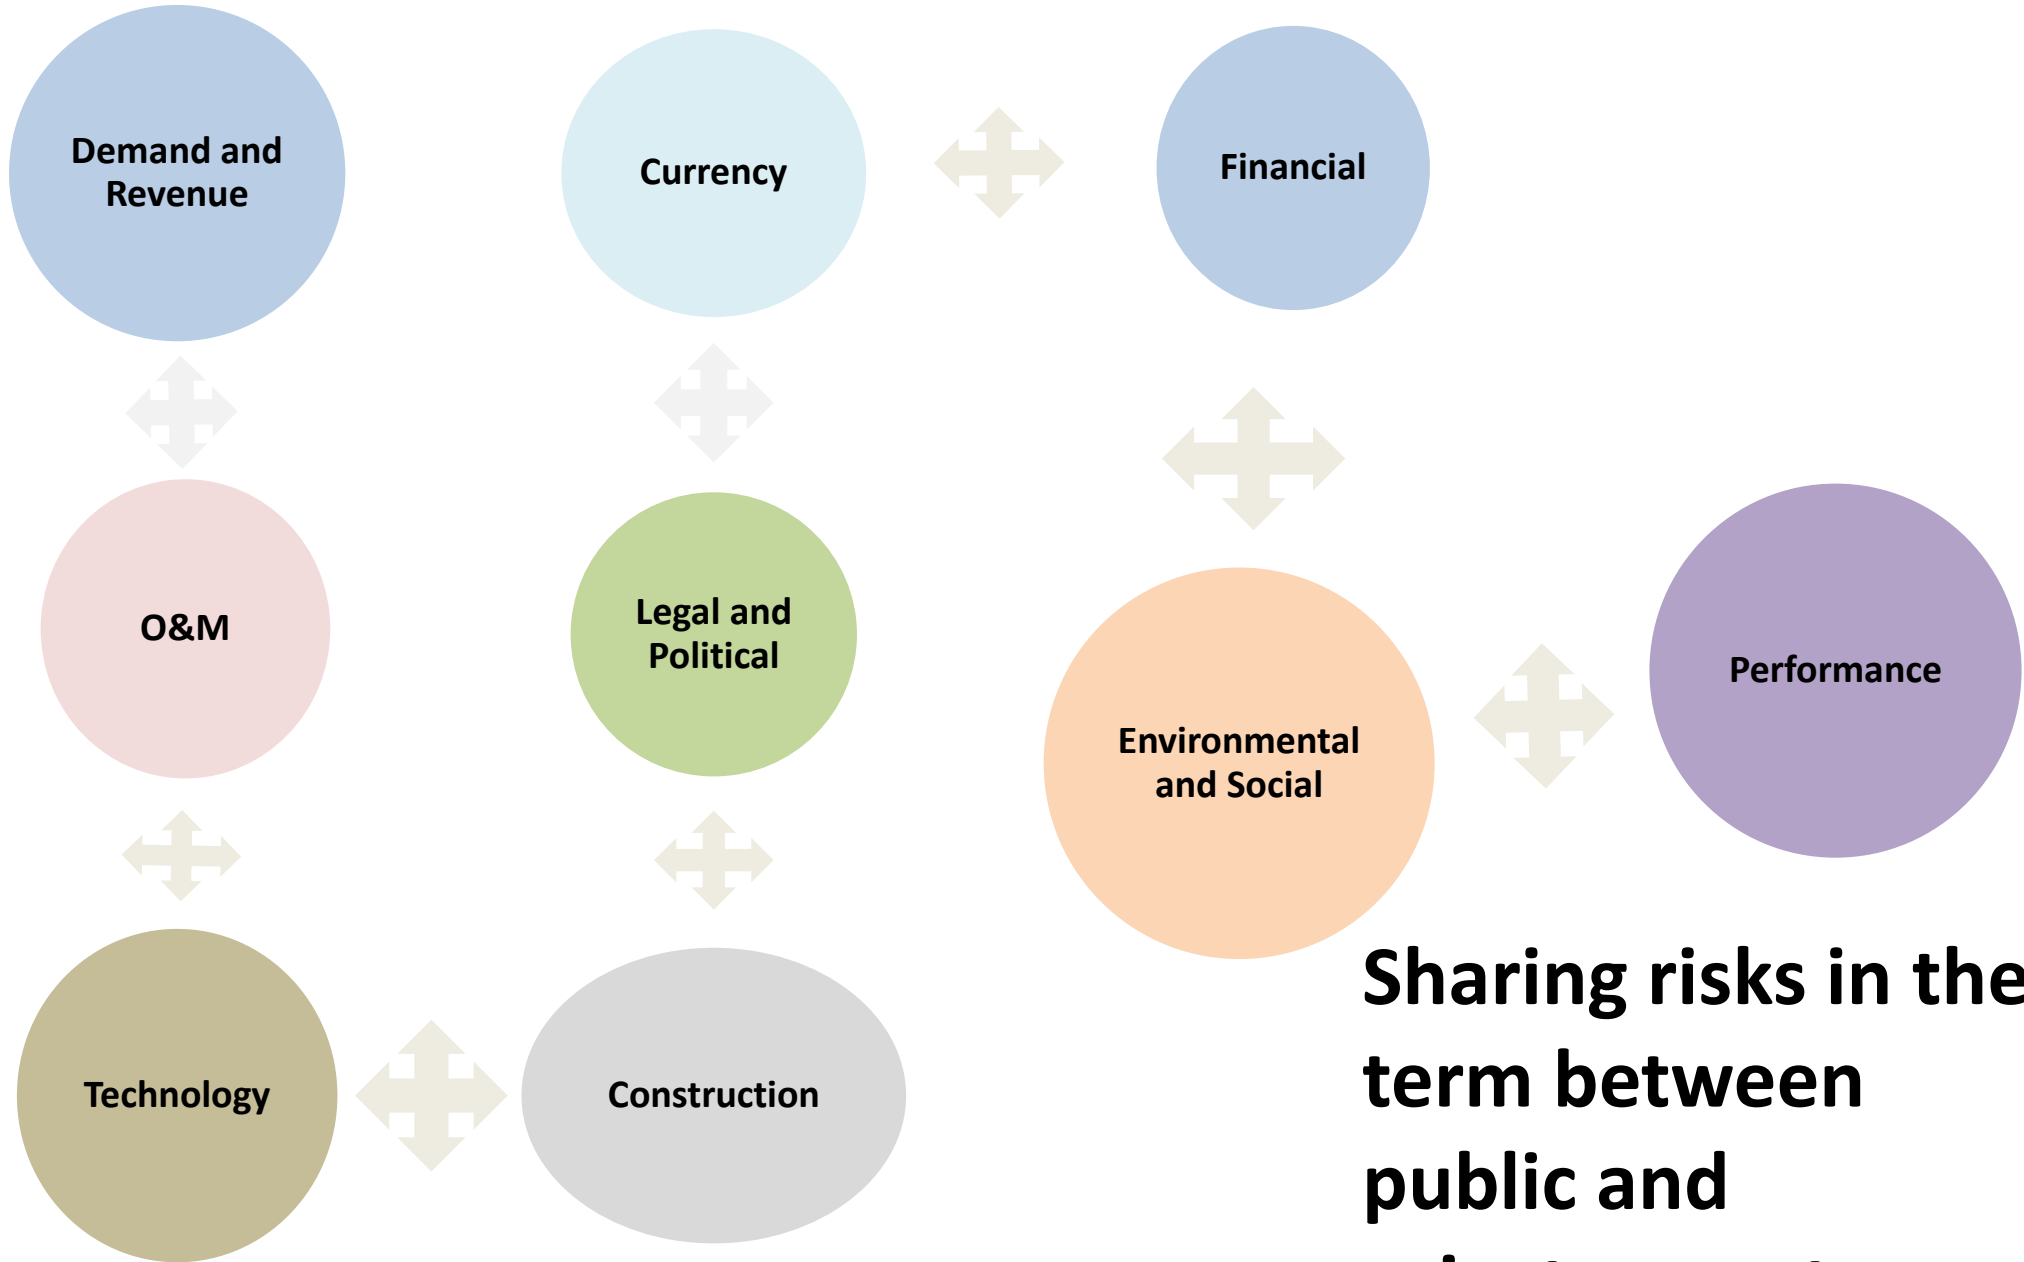

Public Private Partnerships (PPPs) are to tool to crowd-in private capital and expertise to deliver public infrastructure and services

Sustainable infrastructure is fundamental for FDI and to demonstrate ease of doing business.

Deploying infrastructure is complicated, expensive and risky. Governments are not always able to finance, build and operate public assets/services by themselves.

Global infrastructure deficit to be more that 90 trillion. Public capital and expertise are required.

Sharing risks in the longer term between public and private counterparties

IIAs can bring additional layers of complexity to negotiate PPPs that bring value for money for the public interest
